

Request from Nagano City

As we head into the end of the fiscal year, the number of new COVID-19 cases is increasing. Please enforce the 3 measures below to prevent the spread of infection.

COVID-19 is transferred through droplets in the air. Always wear a mask when talking with others, even during meals.

Droplets can also end up on your hands, so thoroughly wash your hands and use hand sanitizer often.

If you have a fever or sore throat, avoid going outside and see a doctor as soon as possible.
